

Digital-first banking reimagined with our proven next-gen core banking platform

Galileo stands committed to providing the leading, next-gen digital banking platform that empowers financial institutions to accelerate the delivery of exceptional customer experiences, increase employee efficiencies, reduce operational and support expenses, minimize IT maintenance and offer immediate access to advanced analytics.

To be future-ready, financial institutions are reinventing themselves from the inside out and are benefiting from the adoption of Cyberbank Core. A powerful platform designed to deliver tailored financial products at unimaginable speed - and at great scale.

WHY CYBERBANK CORE

DIFFERENTIATE WITH STRUCTURAL FLEXIBILITY

- Accelerate time to market and deliver novel financial products and services to customers in real time across all devices and conversational applications.
- Offer meaningful, contextual financial offerings that ultimately become integral to your customer's lifestyle in new and profound ways, whether to large target audiences or to an audience of one.
- Harness new technologies as they evolve with a cloud-native platform that provides greater security and scalability than traditional office-based systems.

ELEVATE CUSTOMER-CENTRICITY

- Use data analytics to better anticipate customers' needs to deliver the right offer at the right time to the right person.
- Elevate customer service by providing digital-first access with a seamless interface - anytime, anywhere.
- Gain an integrated customer view across all points of contact, with a client-tailored data repository that combines customers' information, products and transactions at a multi-dimensional level.

GET HIGH PERFORMANCE, ROBUST COMPLIANCE

- Access a high-performing, modern architecture built entirely on the power of APIs - enabling you to build market-leading solutions that can be deployed quickly.
- Align the technology with your specific business needs, making it easier and faster to introduce new services and operations with minimal impact on IT resources.
- Use monitoring, control and corporate governance tools to trace and resolve transactional issues.
- Protect your business and your reputation - get peace of mind with a core banking platform that supports 55+ U.S. federal banking regulations.

GAIN UNINTERRUPTED UPGRADEABILITY

- Change any business rule, process or product definition without interruption to day-to-day operations. Access a fully automated deployment process, including automated security and code tests.
- Define the customer journey without depending on legacy vendors who use closed, proprietary frameworks that require specialists to make system changes that take months to implement.

EXPAND YOUR ECOSYSTEM WITH MODULARITY

- Extend system capabilities by integrating into new platforms, systems and partners via APIs.
- Scale the digital banking platform with granular control, increasing resource efficiency and ensuring exceptional customer experiences.
- Mitigate deployment risks. Add or replace microservices to enable Cyberbank to work exactly the way you need them - without impacting your ecosystem.

ACCESS AN END-TO-END DIGITAL BACKBONE

- Link the experience layer with the system of record to deliver unique and meaningful customer engagement by driving innovation at the front-end, changing API product behaviors - while using an extensive set of APIs.
- Operate across multiple devices, currencies and languages to provide personalized financial solutions, 24/7.

Galileo is a leading financial technology company whose platform, open API technology and proven expertise enable fintechs, emerging and established brands to create differentiated financial solutions that expand the financial frontier.
