Launch, scale and grow your own financial services solutions.

You've probably already pictured the path to a better financial future for your customers. Our cloud-native technology and decades of experience can help you bring that vision to life and support you at every stage of growth. We have a strong track record of enabling financial institutions, fintechs and brands to innovate, scale and prosper with a proven platform that's secure and compliant from the ground up.

Our single point of integration puts you in the driver's seat.

Galileo creates differentiated products that are tailored to your customers' needs. Our simple tools and comprehensive, industry-leading API technology meet you where you are, helping you optimize your business and drive ongoing innovation for profitable growth and maximum impact.

We help companies bring their vision to life, accelerate their journeys and build unique and differentiated financial solutions that are simple to use, scalable and sustainable.

WHAT DO YOU WANT TO CREATE?

- Digital and Neobanking
- Consumer Payments
- B2B Payments and Banking
- Growth and Activation
- Investing and Cash Management
- Embedded Finance
- Cryptocurrency

HERE'S HOW WE DO IT:

- Cloud-based platform for resilience and on-demand scalability
- Powerful, flexible APIs
- AI-based customer engagement engine that supports delightful customer experiences via intelligent digital assistants
- Trusted go-to-market guides with a proven playbook to help turn your vision into reality and adapt to rapidly evolving customer demands

Why clients choose Galileo.

Galileo expands the financial frontier by partnering with innovators, builders, and business leaders to reinvent how people interact with their money.

Solutions

Launch tailored experiences that drive engagement

- Leverage your APIs to reimagine financial services
- Enable leading-edge, AI-based conversational banking to deliver meaningful recommendations at point of need
- Create frictionless, digital-first experiences
- Drive profitable growth with digitally native products (e.g., deposit, lending, payments, checking, credit, rewards, investing)

Platform

Expand reach for scalable growth

- Use the power of Cyberbank, the cloud-native, structurally-flexible platform that gives you speed and scale
- Use developer-friendly RESTful APIs to create any financial product
- Access a highly configurable, cloud-native financial technology that integrates third party solutions to create a digital ecosystem

People

Your trusted guide for a better financial future

- Find a partner who will think boldly and turn your vision into a reality
- Leverage our 20+ years of experience to innovate faster
- Select the team that helped launch the transformative power of fintech

Fully integrated financial technology begins and ends with humans.

We're the platform fintech is built on. Innovated by humans. For humans. We never stop learning from the people who use our products. Together with our clients, we're applying imagination, courage and grit to the future of financial technology. No matter how you want to reinvent the financial experience, we're with you on the journey-so you can think boldly and deliver big.
